CCM UNIX Lab Component Refresh

Login using your CCM credentials.

Change into your "home" directory: **cd /home/***your_userid*

Copy the components from the instructor's CCM shared directory at
/home/gcullen/nasmprocs to your personal directory at **labpgms**

    Example: **cp /home/gcullen/nasmprocs/*   labpgms/ -pr**

Now, change into your target directory: **cd labpgms**

The macros, subroutine library and assemble/link scripts are refreshed.

You can view the filelist: **ls -lsta**
